The No.1
best-selling portable
fibre range!

ARMOURLUX
COMMUNICATE PROTECT DELIVER

ArmourLux300

The Right Solution

ArmourLux300 meets the demands of mobile fibre optic communication, for media, audio, security, data...and more. Despite the variety of uses the requirements are often similar - a re-usable fibre cable that is easy to deploy, retrieve, connect, transport and store, over and over again. **ArmourLux300** addresses all of these needs.

So what's unique about **ArmourLux300 iPPRO**?

We use a mini tactical cable for the **ArmourLux300** series, which has qualities of the standard tactical cable used in the **ArmourLux500** series, in a more compact form. The advantage is it provides much higher cable carrying capacity per reel; ideal if size is important for logistics and storage. On our smaller 235mm wide reel we can fit 207m of fibre! It's ideal for harsh environments, striking a balance between durability and portability. It has a high crush resistance yet remains flexible so its easy to deploy and retrieve.

Buy with Confidence

All ArmourLux assemblies are made in the UK. We're also an ISO9001 accredited company, where quality and customer service are our highest priorities. With over 25 years experience as a trusted provider of fibre optic cables, you can be reassured we understand the requirements of mobile, fibre optic communications.

The **i-PRO** Connector

The ArmourLux300 range offers water and weather-proof IP68 rated connectors, ideal where connections are being made outdoors.
